Carbon BISULPHIDE

out the least danger.

Prepared especially for killing Squirrels, Gophers, Rats, Ants, Moths, Weevil, Phylloxera, Scale, Lice, &c. Is a liquid, which, when applied, fills the burrow with its vapor and thereby kills every occupant of the hole without injuring anything outside. The animal cannot get away but dies in the hole and never becomes offensive Comparing it with other poisons we find that strychnine poisoned wheat. Phosphorus &c. are all inferior to the sulphide in being apit to kill the pet dog, sheep, insectiverous bird, &c. The animal may eat them or not as it pleases, and if eating crawls out and creates a stench or poisons the dog, cat or other pet. Read & Foster's Bi-sulphide is safe, cheap and effective, and can be applied by anyone at any time without the least danger. The vapor of this m terial is heavier than sir, and by its pressure reaches quickly every crack, crevice or department in the hole, destroying immediately all animals or insects contained therein.

The Carbon Bisulphide is put up in one and three-pound bottles, and six, twelve and fifty-pound cans. Each bottle or can is accompanied by complete directions, and is ready for field work. Manufactured and prepared by READ & FOSTER, Los Angeles Chemical Works. All work. Manufactured and prepared by READ & FOSTER, Los Angeles Chemical Works.
